

NEUILLY-SUR-SEINE

Paris, 27 May 2021

100% electric trucks:**Household waste collection in Neuilly-sur-Seine (France), entrusted to SUEZ, will be carried out with ten Renault Trucks D Wide Z.E.**

The municipality of Neuilly-sur-Seine (near Paris) has decided to make extensive use of electric energy for household waste collection. In this context, SUEZ has renewed its confidence in the French manufacturer Renault Trucks by ordering ten additional 100% electric D Wide Z.E trucks.

After several months of operation of the first D Wide Z.E., SUEZ and Renault Trucks have drawn up a positive appraisal of their collaboration and are committed to collections that are more respectful of the quality of life of citizens. These new-generation refuse collection vehicles will collect waste between Neuilly-sur-Seine and, depending on the type of waste, Saint-Ouen or Gennevilliers, without emitting any pollutants or CO₂.

Reducing CO₂ emissions and improving the quality of life of citizens is a major concern for both SUEZ and Renault Trucks. After assigning the first D Wide Z.E. truck to the waste collection of the 63,000 inhabitants of Neuilly-sur-Seine in July 2020, SUEZ and Renault Trucks have drawn up a positive appraisal of this partnership. The electric technology is perfectly suited to household waste collection and provides a major improvement to the ecological footprint and to the comfort of users and local residents, with zero local emissions and CO₂ emissions reduced by up to 95%.

This first assessment also allowed some technical adjustments to be made, such as programming the cabin heating and optimizing the equipment's operation, including the number of compaction cycles, the number of shaking operations and the speed of the mechanisms.

"A contract of this scale shows the maturity of electric technology and the enthusiasm of the market," explained **Christophe Martin, Managing Director of Renault Trucks France**. "Our electric trucks meet the operational needs of our customers. All the indicators are turning green and the era of pioneers, such as ourselves, is behind us, with fewer obstacles to purchase." The French manufacturer is aiming for 10% of its sales to be electric vehicles by 2025.

Fabrice Rossignol, Executive Vice President of SUEZ Recyclage & Valorisation France, added, "Renault Trucks a long-standing partner, perfectly meets SUEZ's expectations in terms of 100% electric vehicles. The operational expertise we have developed enables us to meet the requirements of local authorities, such as Neuilly-sur-Seine, who wish to introduce environmentally friendly, sustainable waste collection locally while preserving the quality of life of citizens. This partnership is also in line with the SUEZ Group's objective of reducing CO₂ emissions by 45% by 2030."

Jean-Christophe Fromantin, Neuilly-sur-Seine Mayor, welcomes the imminent arrival of these new vehicles, which meet the city's specific requirement to improve service quality. "These zero-emission trucks are part of our ambitious

approach to reducing our carbon footprint. With almost 39% of our municipal fleet made up of electric vehicles, Neuilly-Sur-Seine is a pioneer in the decarbonisation of the vehicles needed for public services”.

About Renault Trucks:

Building on the legacy of 125 years of French truck know-how, Renault Trucks supplies transport professionals with tools they need to more efficiently conduct their business. The manufacturer offers a large choice of innovative services and vehicles (from 2.8 to 120 T) adapted to a wide range of transport activities, including distribution, construction, heavy construction, long distance and fire & rescue. Active in over 100 countries, Renault Trucks has a distribution network of over 1,450 service outlets, including over 300 in France. The design and assembly of Renault Trucks vehicles, together with production of most of the components, take place in France (Lyon, Limoges, Blainville and Bourg-en-Bresse). As testimony to its roots in France, the Renault Trucks T, C, K, D and D Wide have held the "Origine France Garantie" label since 2014.

About SUEZ:

Since the end of the 19th century, SUEZ has built expertise aimed at helping people to constantly improve their quality of life by protecting their health and supporting economic growth. With an active presence on five continents, SUEZ and its 90,000 employees strive to preserve our environment's natural capital: water, soil, and air. SUEZ provides innovative and resilient solutions in water management, waste recovery, site remediation and air treatment, optimizing municipalities' and industries' resource management through "smart" cities and improving their environmental and economic performance. The Group delivers sanitation services to 64 million people and produces 7.1 billion m³ of drinking water. SUEZ is also a contributor to economic growth, with more than 200,000 jobs created directly and indirectly on an annual basis, and a provider of new resources, with 4.2 million tons of secondary raw materials produced. By 2030, the Group is targeting 100% sustainable solutions, with a positive impact on our environment, health and climate. SUEZ generated total revenue of €17,2 billion in 2020.
