## **SUEZ wins two contracts in the automobile sector in Morocco**

**SUEZ confirms its leading position in the industrial waste management in Morocco by winning two 3-year contracts worth a total of 17.6 million euros. The Group will support PSA and Renault in the treatment and recovery of their industrial waste.**

Morocco generates 3.5 million tons of industrial waste per year and this volume is set to reach 12 million tons in 2030. For several years, SUEZ has been supporting the Kingdom's 2014-2020 industrial acceleration plan by helping the Moroccan industrials to organise a circular economy. The Group is the preferred partner of the car manufacturers present in Morocco. In 2019, SUEZ has also invested in two multimodal platforms to recover industrial waste from the free zones of Tangier and Kenitra, in addition to its Bouskoura platform. The two contracts won with PSA and Renault illustrate this commitment.

### **SUEZ wins the contract to manage the industrial waste of the Groupe PSA's plant in Kenitra**

Groupe PSA has selected SUEZ for the comprehensive management of the industrial waste generated by its new plant in the Atlantic Free Zone (AFZ) in Kenitra. This new 3-year contract, which began in October 2019, reinforces the partnership with SUEZ which, as of 2018, was in charge of the waste management during the construction of the plant.

SUEZ will deploy the Green' Compact solution which includes a condensed collection plan and a tailor-made industrial waste management park. This solution is scalable, in terms of both human and material resources, to accompany the ramp-up of the plant's production chain.

SUEZ is committed to supporting Groupe PSA to achieve its "zero landfill waste" objective by offering innovative solutions for the recovery of all waste, including composting of organic waste. The location of Groupe PSA's plant, in the heart of the Atlantic Free Zone, will create strong synergies with SUEZ's multimodal platform which will be commissioned in 2020.

### **SUEZ strengthens its partnership with Renault in Morocco**

Last June, Groupe Renault Morocco renewed the contract with SUEZ to ensure the sustainable management of waste generated by its two production plants in Morocco, located in Casablanca and in Tangier, until 2022.

SUEZ is committed to supporting Renault, a leading car manufacturer in Morocco with a production capacity of over 400,000 vehicles per year in its two Moroccan plants.

Since 2008, SUEZ is in charge of the comprehensive management of all types of waste for Groupe Renault Morocco, from the collection in the production workshops, the sorting (pallets,

cardboard, metals, process oils, packaging and plastics from production), to the recovery or treatment by qualified sectors. SUEZ also provides engineering and consultancy services to Renault by proposing areas of progress and dealing with the administrative formalities as part of an initiative to reduce waste and optimise its recovery.

*"With these contracts, SUEZ reinforces its position as a benchmark player in the treatment of industrial waste in Morocco. Our offer of innovative solutions that meet our industrial clients' needs is focused on improving the treatment and recovery of their waste. SUEZ Morocco's sales teams have demonstrated their capacity to listen to the needs of our clients for a more thorough and transparent monitoring of their waste and have helped them to implement optimised industrial processes to serve the circular economy"* declared Ana Giros, SUEZ Senior Executive VP in charge of the APAC (Asia, Australia and India) and the AMECA (Africa, Middle East, Central Asia) Regions.
