

BECOME A SUSTAINABLE & SMART CITY

Our methodology is collaborative

WE SEE DOMINO CITIES:

their interconnected infrastructure and services generate a high level of poorly controlled interdependence.

SUEZ helps cities to achieve their ambitions and their transformation:

BECOME SUSTAINABLE & SMART CITIES.

creating resources intelligently on behalf of their residents.

Our methodology at the service of cities:

Co-construction with stakeholders.

Diagnosis with stakeholders

- Residents' practices
- Cities' changing needs
- Elected officials' projects

Translating ambitions into concrete objectives

Definition of objectives

- Attractiveness
- Operational efficiency
- Quality of life
- Financial efficiency

Collecting, processing and analysing data via digital platforms

Implementation decisions

- Identifying the right partners and testing new grouping structures
- Identifying appropriate technologies
- New contractual tools between public and private players

Putting projects into practice

Monitoring and controlling performance

- Indicators and tools for measuring results
- Regular evaluation approach
- Continuous improvement guided by objectives
