**SUEZ joins the Global Impact Coalition, a CEO-led collaborative platform for a net-zero chemicals future**

**SUEZ, a global leader in circular solutions for water and waste, has become a member of the Global Impact Coalition (GIC). Incubated at the World Economic Forum, the GIC is an independent coalition working with industry leaders to enable net-zero emissions in the chemical sector. SUEZ has committed to providing the coalition with its expertise in recycling and recovery solutions, essential to achieving the industry's net zero and circularity targets.**

The GIC is an independent coalition guided by global chemical industry leaders including BASF, SABIC, Clariant, Covestro, LyondellBasell, Mitsubishi Chemical Group, Sabanci, and Syensqo. The coalition provides a platform for companies to co-develop and spin off high-impact sustainability projects in the chemical sector. It catalyses the co-creation of new business models, R&D hubs, and proof-of-concept pilots aimed at reducing emissions and the reliance on fossil fuels.

Increasing circularity throughout the value chain is key to achieving net zero emissions in the chemical industry. With more than 160 years of history, SUEZ is a trusted partner for circular solutions in water and waste. Through recycling and energy recovery, SUEZ transforms waste into new resources: in 2023, the Group produced 2.7 million tonnes of secondary raw materials and generated 7.7 TWh of energy from waste and wastewater.

SUEZ plays a critical role in driving circularity in the chemical industry while reducing its dependence on fossil fuels. In particular, the Group has strong expertise in providing innovative and resilient solutions to global chemical giants for waste recycling and recovery. SUEZ provides circular solutions that enable industrial customers to phase out coal and fossil fuels, such as solid recovered fuels (SRF) from waste. SUEZ will bring this expertise to the GIC to collaborate with the chemical industry on new circular business models and scaling-up sustainable technologies.

Yves Rannou, SUEZ Executive Vice-President, Chief Operating Officer Recycling & Recovery, has been appointed to the Global Impact Coalition Executive Committee.

**Sabrina Soussan, Chairman and CEO of SUEZ** said: *"The Global Impact Coalition is an important initiative to bring together different stakeholders in the chemical industry's value chain to achieve their carbon neutrality and circularity goals. At SUEZ, we'll bring our strong expertise and innovative vision in waste recycling and recovery to the Coalition. SUEZ is a strategic solutions provider to industries and communities for the circular economy and decarbonization. We look forward to playing our part in GIC's high-impact projects and promoting circularity on the path to net-zero."*

**Charlie Tan, CEO of the Global Impact Coalition**, added: *"We are thrilled to welcome SUEZ as a member of the Global Impact Coalition. A world leader in circular solutions for water and waste, SUEZ brings a unique and valuable perspective to the GIC. SUEZ represents a critical link in the value chain needed to enable truly transformative cross-industry projects. Together, we can speed our progress towards a circular, low-carbon emissions future."*

SUEZ, Société anonyme, a company incorporated under the laws of France, with a share capital of €63,757,000. Head Office: 16, place de l'Iris (Tour CB21) – 92040 Courbevoie, France – registered under number: 901 644 989 RCS Nanterre Trade and Companies Registry – VAT number: FR60901644989

## **About SUEZ:**

*Faced with growing environmental challenges, SUEZ has been delivering essential services that protect and improve our quality of life for more than 160 years. SUEZ provides its customers with innovative and resilient solutions for water and waste services. With 40,000 employees across 40 countries, the Group works with customers to create value over the full lifecycle of their assets and services, and to drive their low carbon transition. In 2023, SUEZ provided drinking water for 57 million people worldwide and sanitation services for more than 36 million people. The Group generated 7.7 TWh of energy from waste and wastewater. In 2023, SUEZ generated revenues of 8.9 billion euros. For more information: [www.suez.com](http://www.suez.com) / X @suez / LinkedIn @SUEZ.*

## **About Global Impact Coalition:**

*The Global Impact Coalition (GIC) is a collaborative platform enabling the chemical industry to achieve a circular and net-zero emissions future. Incubated at the World Economic Forum, GIC is an independent coalition guided by global industry leaders.*

*As the industry's first ever CEO-led coalition, the GIC's members collaborate to address challenges that cannot be effectively tackled alone. The GIC provides a cross-industry platform to co-develop and scale-up new technologies and innovative business models to reduce carbon emissions and advance circularity along the value chain.
