

CONSULTING

TOGETHER, ACHIEVING YOUR LOW-CARBON TRANSITION

We support our public and private customers define climate strategies that are tailored to their specific needs and activities.

Our team makes your positive and sustainable projects a reality by leveraging green finance and carbon finance solutions.

Our Consulting & Strategy team has extensive expertise in supporting regional authorities, organisations and industry players, and is recognised both in France and abroad for its ability to bring clients' climate strategies to life, from definition to implementation.

Our expertise and perfect understanding of climate change challenges and associated strategies, combined with our in-depth knowledge of international financial instruments and standards, enable us to support your projects from the diagnostic study phase through to financing.

SUEZ Consulting has sound and diverse experience

Climate diagnostic

Identifying your activity's key climate challenges is essential to establish the greenhouse gas emissions footprint of your operations along its value chain. A comparative competitive study is also conducted.

Climate strategy

Establishing targets to reduce emissions and energy consumption, in line with your objectives and with regulatory obligations, and setting goals for each sector or segment of the value chain.

Climate action plan

Working with you to design a tailored operational action plan. We can help implementing the plan by drawing on our team's wide range of expertise, particularly in supply chain optimisation, sustainable mobility plan, training and awareness among stakeholders...

Climate action financing

Finding financing solutions for your projects through the implementation of green finance instruments, i.e. all financing tools and solutions that support the environmental transition and the fight against climate change: carbon credit certification, eligibility and impact studies for carbon tax and carbon finance regulatory mechanisms...

A perfect understanding of regional challenges to provide sustainable, low-carbon and concrete solutions.
