CRAIG LEWIS JOINS SUEZ TO LEAD AIR QUALITY IN UK

Craig Lewis joins SUEZ Smart & Environmental Solutions as UK Business Development Manager for the Air & Climate Division. He joins from Cardiff Council where he was responsible for ensuring the effective management of all aspects associated with air quality, including the delivery of major air quality driven projects. At SUEZ, his role is to introduce the portfolio of AirAdvanced® services and solutions to address public health, climate change & odour.

Craig is a career specialist on air quality having worked in the sector for over 10 years. His experience spans private and public organisations and across all aspects associated with air quality; regulatory monitoring, engineering performance, consultancy and local air quality management.

The appointment of Craig to this new role, along with the UK based delivery team, makes way for SUEZ to roll out its expertise and technologies across the UK.

Within SUEZ Smart & Environmental Solutions, the Air & Climate division recognises the rising pressures to address poor air quality to protect public health and preserve the natural environment. SUEZ is committed to achieving and improving air quality levels to as low as reasonably practicable.

The Air & Climate Division has developed a global approach for the management of air quality and has been integrating solutions and delivering services for reducing atmospheric pollution and nuisance odours for more than 20 years. The SUEZ Air Advanced service provides a comprehensive end-to-end service to necessitate the delivery of objectives to improve air quality. Here SUEZ's offering serves to diagnose, remediate, optimise and review; a tailored service accommodating the needs of each client and site.

Passionate about putting real solutions in the right places, Craig is delighted to join the SUEZ team;

“I am extremely enthusiastic about the current air quality and climate change agendas, especially in view of the associated adverse impacts to public health and the environment. I am committed to developing and integrating innovative services and solutions to offset the concerns and ensure improved air quality levels. I am really looking forward to this opportunity with SUEZ Smart & Environmental Solutions, and happy to be part of a team that will establish a change for approaching air quality solutions.”

Jerome Arnaudis, SUEZ Global Director of Air, commented;

“We are delighted to welcome Craig Lewis to our team. He brings a wealth of air quality experience and knowledge of the challenges facing industry and councils in the UK.”

About SUEZ:

Since the end of the 19th century, SUEZ has built expertise aimed at helping people to constantly improve their quality of life by protecting their health and supporting economic growth. With an active presence on five continents, SUEZ and its 90,000 employees strive to preserve our environment's natural capital: water, soil, and air. SUEZ provides innovative and resilient solutions in water management, waste recovery, site remediation and air treatment, optimizing municipalities' and industries' resource management through "smart" cities and improving their environmental and economic performance. The Group delivers sanitation services to 64 million people and produces 7.1 billion m³ of drinking water. SUEZ is also a contributor to economic growth, with more than 200,000 jobs created directly and indirectly on an annual basis, and a provider of new resources, with 4.2 million tons of secondary raw materials produced. By 2030, the Group is targeting 100% sustainable solutions, with a positive impact on our environment, health and climate. SUEZ generated total revenue of €17,2 billion in 2020.

About SUEZ Air & Climate:

Within SUEZ Smart & Environmental Solutions, the Air & Climate division recognises the rising pressures to address poor air quality to protect public health and preserve the natural environment. SUEZ is committed to achieving and improving air quality levels to as low as reasonably practicable.

The Air & Climate Division has developed a global approach for the management of air quality and has been offering solutions for reducing atmospheric pollution and nuisance odours for more than 20 years. The SUEZ Air Advanced service provides a comprehensive end-to-end service to necessitate the delivery of objectives to improve air quality. Here SUEZ's offering serves to diagnose, remediate, optimise and review, forming a complete cycle to tackle all pollution challenges
