

Consulting
Engaged

#ConsultingEngaged

SUEZ Consulting acts to promote social and economic development and the environmental transition in the regions where it operates.

By performing consultancy and engineering work with a positive social and environmental impact, we make a concrete contribution to achieving the United Nations Sustainable Development Goals, and especially their climate aspects.

As a multi-local company, we cultivate our diversities and engage in continuous dialogue with all stakeholders to act in favour of local social and economic development.

Our collective and personal commitment, our ethics, our expertise and our creativity are the foundation for our sustainable growth.

Proud of our active role in the environmental transition, we share our skills to ensure our projects.

WE ARE COMMITTED TO

- 1 Acting positively in favour of the environment in all the company's activities
- 2 Acting to promote local economic and social development
- 3 Only providing services that have a net positive social and environmental impact
- 4 Always working proactively to improve the environmental performance of our projects
- 5 Helping our staff to thrive in their work
- 6 Cultivating our diversity of cultures, generations, genders and skills
- 7 Cultivating integrity and transparency and engaging in continuous dialogue with stakeholders

Bruno HERVET
Chief Executive Officer
SUEZ Consulting
